Glue to 1<sup>st</sup> strip

### Step Book

1. Cut out the 3 pages.
2. Fold on the dotted lines.
3. Place the 3 folded pages inside each other with page 1 on top, then 2, and then 3 inside.
4. The folds should all be together creating 6 steps! The reverse of each page will form the bottom 3 steps!
5. To staple the pages, open the folds, keeping the pages still stacked inside each other and staple on the dark little line. (You could punch 2 holes and tie ribbon or string knots instead of staples for a creative touch!)
6. Write inside each step as you would in a tab minibook.
